

Project 2 Report

Dreycen Foiles [dfoiles2]
Olek Yardas [yardsol]

November 7, 2022

1 Introduction

In this assignment, we were tasked with predicting the weekly sales of different departments at several Walmart stores. This is a

2 Methods

To do the regression, we used a very simply model that we know was not going to perform as well as we hoped, but we did not have enough time to improve on. We simply assumed that there was no variation year-over-year. The sales at a given store at a given department would be the same as the same date 52 weeks ago. This method worked surprisingly well and, in our view, gave a ratio of accuracy to evaluation speed.
